Re Item V.

- 1 The following documents are referred to in this communication:
D1 : GB 2 083 142 A (PFEIFFER KUNSTSTOFFTECHNIK GMBH & CO KG) 17
March 1982 (1982-03-17)
D2: DE 197 27 485 A1 (KAUFMANN, RAINER, DIPL.-ING., 27753
DELMENHORST, DE) 7 January 1999 (1999-01-07)
- 2 Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parentheses applying to this document):
a container (16,21) having a dispensing outlet (26), a section of said outlet being provided with a pumping assembly (30,33) and being provided with a pumping button.
From this, the subject-matter of independent claim 1 differs in that:
the pumping assembly is sized to be insertable into the section and the button is a section of the container wall.
- 2.1 The subject-matter of claim 1 is therefore novel (Article 33(2) PCT)
The problem to be solved by the present invention may be regarded as:
making the construction of the combination of container and pump easier and thereby cheaper.
- 2.2 The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:
the prior art discloses pumping assemblies that can be inserted through the outlet section of the container, however no document discloses or renders obvious the combination of features disclosed in claim 1.
3. Claims 1-29 are industrially applicable in the field of manual dispensers.
